Solar System #517 is being terrorized by a gang of Alien Serpentbeasts. None of the eight worlds are safe. And no one seems able to stop this massive invasion.

In short, #517 is in deep trouble.

They need someone who can run. Fast. Someone who can jump. From world to world. And someone who's more than handy with a laser missile. They need you!

THE SCENE

The Place: Solar System #517.
The Problem: Invasion by Grax and his gang of galactic

FOR 3-D PLAY: If you want to play in 3-D mode, press the SELECT BUTTON. And don't forget your 3-D glasses. (You can use the special glasses supplied in this package or use the NINTENDO 3-D glasses. The red lens should be on the right-hand side when you use the 3-D glasses.)

thugs. Better known as Alien Serpentbeasts.

Not only is Grax ruthless, shrewd, powerful and totally terrifying. He also has seven brothers who are every bit as unfriendly as he is.

What's more, he has summoned all his brothers — and an endless army of buddies — to help him in this wretched play.

Your task is to cover all eight of the worlds in Solar System #517. Eliminating enemies as you go.

You'll have to move fast. Jumping over bottomless canyons as

you go. And avoiding or shooting attacking enemies.

Along the way you'll run into (literally) ancient columns. You can also jump on top of them. Either way, they hold many surprises. Most of them beneficial. But some of them dangerous.

Keep going until you reach the eighth and final world. There, you must duke it out with the most dangerous of all the dragon brothers. And save Solar System #517 from certain collapse.

THE SCREEN

Once you press the START BUTTON, you will see the following information:

3. *Caverno* — Some of the canyons are so wide you'll need special JUMPERS to get over them.

4. *Quanto* — Meet up with a slew of new enemies.
5. *Terrero* — You'll need impeccable timing to slip by the HANDS.
6. *Aquo* — An eerie underwater world.

THE BAD NEWS

As if dealing with Grax, the Alien Serpentbeast, wasn't bad enough, he's sicked an entire army of friends, relatives and paid henchmen on you.

Plus, Solar system #517 has some of its own native hazards that you must try to avoid or void out.

Here's a list of the enemies and hazards you'll encounter:

Menacing Meanies

You run into these guys all over the place – from the second you set foot in Solar System #517.

They may change colors, depending on what World you're in. But they'll always be a menace.

Stay out of their way. Or zap them with your LASER MISSILE.

White Willies

They look kind of like GREEN MEANIES. But they're faster. And tougher.

Towering Infernos

Don't touch these treacherous towers of deadly fire.

Magic Mushrooms

These harmless-looking edibles are pure poison. You'll find them – or rather they'll find you – when you bump into one of the columns. (More on columns in *THE GOOD NEWS* section, below.)

Anyway, avoid these deadly delights at all costs.

Robot Head

Like the MENACING MEANIES, these guys will try to bump you off. Avoid 'em. Or shoot 'em.

Hand Man

This roving hand tries to stop anything and everything that gets in its way, including you. So ditch it.

Venus Die Trap

Don't get stuck in this thing's sticky tendrils. Slip by it. Or slip it a deadly blast.

Sea Shell

A pretty little thing. That will try to stop you dead in your tracks. Dance around it.

Carnivorous Clam

This giant underwater monster will try to eat you alive. So stay away from it.

Here's a hint: It moves in circles.

Spinners

These high-tech gizmos will try to chase you down. So chase them down instead with a hearty hit from your LASER MISSILE.

Dog Face

This guy's as tough as he is ugly. What's worse, he can't be shot! So stay as far away from him as you can.

Vapor Cloud

The stuff this thing puts out is 100% pure poison. Attack it. *Before* it attacks you.

Mean TV

A deadly piece of video technology. Blast it!

Diamond Demon

Like most real diamonds, this thing is indestructible. So watch out!!!

The Serpentbeasts

There's one of them guarding the end of every world. They're terrifying. Treacherous. And totally dangerous. It'll take several well-placed hits to kill them. They just don't go down easy.

THE GOOD NEWS

The inhabitants of Solar System #517 know that the task they've given you isn't an easy one. So, to try and help out a bit, they've hidden some very useful tools inside the rows of columns.

To get these tools, simply bump into or jump on a column, then try and catch what falls out. (Unless, of course, it's a MAGIC MUSHROOM.) Here's what you'll find inside the columns:

Laser Missiles

Once you catch one of these, you'll have unlimited firing power – at least for the duration of your current life.

Power Potion

Capture a bottle of this stuff and you'll be temporarily invincible. As long as your hair is red, you'll have the power. When it changes back to its original color, you'll know the power's run out.

Atomic Power

This little atom-like morsel will also make you unstoppable. But its power, too, is temporary.

Have a Heart

Don't pass up this one. It gives you an extra life!

Super Stars

Catch as many of these as you can. They're worth extra points.

Cosmic Clock

Catch this one, and the timer resets itself to the beginning. So it buys you more time.

Warp Balloon

Grab onto this one. It'll take you to a special BONUS ROUND where there are no enemies. Only beautiful SUPER STARS worth extra bonus points.

Junior Jumper

They make you jump higher. And farther. And for some of those canyons, you're going to need them.

Super Jumper

Just like the JUNIOR JUMPERS. Only better!

THE FINAL SCORE

The points you earn for catching certain items and defeating different enemies are added together

to produce your final score. Here's what earns what:

ITEM	POINTS	SPECIAL NOTE
MISSILES	500	AFTER 1st one
POTIONS	500	AFTER 1st one

- For the wider canyons you'll need a running start – or maybe even a jumper.
- Try and collect as many extra lives as possible. You can never have too many!
- When you lose a game, and want to start over from the beginning of the world you were destroyed in, follow these simple steps:
 - 1) Hold down BUTTON A.
 - 2) Press START.

Good Luck!
